CIS	110	IC1 IC2 ICP IC3	Introduction to Computers	NOTE: A MAC computer will not have the software needed for this class. A student will need to use a computer that has the Windows 7 operating system on it. (A MAC does not have Windows 7 unless you install it into a virtual machine on the MAC.) Microsoft Access software is not available for MAC computers. A student will need to use a computer with the MS Access software on it to complete assignments for this class.	Office 2013 Suite. There are many suite variations of 2013. Students should purchase: Microsoft Office 365 University Edition, 365 Home Premium or Office 2013 Professional. The most economical way to purchase the software needed is to purchase the MS Office 365 University 2013 version at a student education price of \$79.99 + tax, online at <a href="http://www.ultimatesteal.com">www.ultimatesteal.com</a> (Regular retail \$399.95). You MUST use your school email address to get this reduced student pricing when completing the purchase. Student on financial aid cannot use financial aid funds during the first week of school for this website but may purchase the MS Office 2013 version in the bookstore that week. (bookstore price \$108) This office suite package is priced lower than buying MS Word, MS Excel, MS PowerPoint, or MS Access separately NOTE: The Office 2013 Student version will not have Access software which is needed for this class. The starter version that is sold on PCs will also not have the software needed.
