

Fire Protection Technology

degree and certificate programs

The Fire Protection Technology curriculum is designed to provide individuals with technical and professional knowledge to make decisions regarding fire protection for both public and private sectors. It also provides a sound foundation for continuous higher learning in fire protection, administration, and management. Course work includes classroom and laboratory exercises to introduce the student to various aspects of fire protection. Students will learn technical and administrative skills such as fire prevention, building construction, arson investigation, fire protection safety, fire suppression management, law, and codes.

Study Options

- A.A.S. Degree [A55240]
- Certificate Programs [C55240, C55240FS]

Program Outcomes

Students may be awarded a non-degree credential (i.e., certificate, diploma) after completing a specific portion of the Associate degree program.

Possible Careers

Graduates should qualify for employment or advancement in fire departments, governmental agencies, industrial firms, insurance rating organizations and educational organizations. Employed persons should have opportunities for skilled and supervisory-level positions within their current organizations.
