

EMT Supply/Equipment Information for Students

The EMT class will require you to wear a uniform. Shirts are provided as a part of your supply fee. You will need to buy pants, boots, belt, and a stethoscope. Below are examples of the items required and a cost. All items listed here are from [Galls.com](https://www.galls.com) but I do not advocate this company over others, just one I found on the internet.

PANTS: These are 511 brand pants and run approximately \$70 per pair depending on the size. **Color:** black or dark navy.

BOOTS: color black. These are Galls Zipper boots. Run approximately \$70 a pair.

SPRAGUE TYPE STETHOSCOPE. Cost is about \$11.99 each. If you are planning on going further into medicine, I would recommend getting a higher grade stethoscope but wait until you have talked to some current practitioners as they can advise you on a brand to purchase as the higher quality stethoscopes go for \$150 +.

BLACK BELT. Cost is approximately \$12.
